Kimchi noodles

29.00$

Here's a super tasty recipe for Kimchi Noodles, stir-fried with lots of healthy veggies you probably have on hand. Keep it vegan or add an egg, chicken or shrimp! Crispy tofu is also a delicious option here! I love recipes where you can comb through your fridge and see what needs using up. This fermented cabbage can be served as a side dish, over a bed of rice, folded into scrambled eggs, whirred into tomato sauce, or even just eaten as is.
